Park Ridge

NURSING CENTER

Park Ridge

NURSING CENTER

Park Ridge Nursing & Rehabilitation Center is a locally owned & operated completely refurbished facility located in the historic Five Points area of Jacksonville.

Our facility houses a 104 bed skilled nursing center offering Medicare Rehabilitation, long term and short term residence. Services available at the Nursing Center include room and board, physical, occupational and speech therapy, skilled nursing care, social services, recreational activities and three nutritious

meals per day approved by a registered dietician.

At Park Ridge, we strive to provide excellent medical treatment and care. Our highly skilled nursing staff is on duty 24 hours per day, 7 days per week. Each resident's personal physician is most welcome, or our Medical Director's team will follow their plan of care.

Each resident is carefully screened by our professional staff so we may tailor a program that is beneficial medically, socially, and spiritually. Our Social Services Director will also assist patients in applying for any benefits for which they may be eligible.

At Park Ridge, we make sure that each of our residents has everything they need to make their daily life the most pleasant experience possible.

We also provide items such as wheelchairs, Geri chairs, medical supplies, cable TV access, telephones, beauty/barber shop, and a full activities department.

Our short term inpatient rehabilitation program focuses on helping individuals return to their prior roles and activities of daily life. With skilled and experienced clinicians, including

physical, occupational, and speech therapists, we strive to improve each patient's ability to function and care for themselves again.

Please feel free to come tour our facility and let us know if we can assist you in any way, or visit us online at parkridgenursingcenter.com.
