

## What Happens When There's An Emergency?

Our Central Monitoring Station will notify Emergency Medical Services (EMS) with the knowledge of any existing medical condition or issues.

This information helps prepare the medical emergency responders to assist you or a loved one effectively and efficiently when needed most.

This required contact and medical information is kept strictly private and collected prior to activation.

The Central Monitoring Station is listed with, and regulated by, Underwriters' Laboratories for Protective Signaling (UL 1981).

CO

Our Personal Emergency Response System (PERS) is expandable to meet your needs. We can monitor for Smoke and Heat, Carbon Monoxide (CO), Motion Detectors for Inactivity, Gas Leakage, Flood and Water, Temperature and Humidity. We can monitor over a standard phone line, internet, or GSM.

### How LifeSOS can help protect you?

In many home emergencies, the victim is unable to reach a phone to call for help. LifeSOS works in any kind of emergency, simply depress the button on your remote transmitter and it will instantly activate the Base Unit located in your home. This unit will immediately play back the help message to alert the people around if any, and connect you to the Central Monitoring Service. The unit then tells them your name, address, phone number, etc., through 2-way voice communication, you can converse with them instantly.

If the internal battery goes too low, a warning indication will be shown on the Base Unit to remind the user. The Base Unit contains a rechargeable back-up battery, which automatically takes over during a power outage.

The medical button may be worn on the arm like a wristwatch or around the neck on a lanyard as a pendant.

Our medical buttons come with a vibration sensor inside, that will automatically issue an inactivity alarm signal if it has been kept still for more than 12 hours.

### Designed For Peace Of Mind

The LifeSOS is designed for people who wish to gain full-time peace of mind, and can be particularly beneficial to Patients, Senior Citizens, Physically Challenged People, Care Givers, Health Care Providers or Anyone Living Alone.

The LifeSOS is expandable to provide more than just Medical Monitoring. We can do Security, Environmental, and Home Automation from just one unit.

Call (316) 351-5780 today or visit us on the web to find out more about our products and services.
